TECHNICAL SKILLS

- **Languages:** JavaScript, PHP, Laravel.
- **Databases:** MongoDB, MSSQL, MySQL.
- **Runtime:** Nodejs.
- **Frameworks & Libraries:** React, Express.js, Tailwind CSS, Material UI, Bootstrap, Mongoose, WordPress.
- **Developer Tools:** Git, GitHub, Google Cloud Platform, VS Code, Chrome Dev tools, Swagger UI, Mozilla Dev tools, Postman.

TOP PROJECTS

- [Travel-pin App](#) | **JavaScript, NodeJS, Express, MongoDB, HereMap API**
 - Developed a cross-platform travel app allowing users to pin and save experiences using their geolocation.
 - Implemented full CRUD functionality and seamless map interactions with HERE Map API.
- [User Management System \(Backend\)](#) | **JavaScript, NodeJS, Express-handleBars, MySQL**
 - Developed a User Management System using MySQL for database management and Express-Handlebars for dynamic front-end rendering.
 - Implemented full CRUD (Create, Read, Update, Delete) functionality to manage user accounts efficiently, providing an intuitive and responsive interface.
- [Snack Store \(Backend\)](#) | **PHP, Material Ui, MySQL**
 - Developed a Snack Store Application using PHP for order processing and MySQL for data storage.
 - Designed an intuitive and visually appealing user interface with Material UI, ensuring a seamless user experience for placing and managing orders.
- [Car-Rental.Com](#) | **React, Tailwind CSS, JavaScript, NodeJS, MongoDB**
 - Participated in building a full-stack car rental booking platform with user-friendly features for customers and owners.
 - Integrated secure backend logic with CORS and authentication mechanisms.
- [Job-API \(Backend\)](#) | **NodeJS, MongoDB, Express.**
 - Created a RESTful API enabling user authentication, job posting, and tracking.
 - Used JWT & bcrypt.js for secure access and Swagger for API documentation.
- [Library](#) | **JavaScript, NodeJS, MongoDB, Express, Bootstrap.**
 - Developed a digital library system with advanced search, upload, and book retrieval features.
- [Task-Manager \(backend\)](#) | **JavaScript, NodeJS, Mongoose, MongoDB, Express.**
 - Built a productivity-focused API enabling task creation, tracking, and updates.

PROFESSIONAL EXPERIENCE

Freelance Software Developer

Nov 2023 - Present

- Design, develop, and deploy responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Test and debug APIs with Postman, ensuring reliable and robust endpoints.
- Document APIs using Swagger UI, offering clear and accessible interfaces for team developers.
- Manage full-stack development, ensuring seamless integration between front-end and back-end systems.
- Collaborate with senior developers to enhance code quality, performance, and scalability.
- Participate in code reviews, adhering to clean code and best practice standards.
- Use Git for version control and GitHub for efficient collaboration and repository management.
- Deploy applications on Render, ensuring optimal performance and uptime.
- Utilize SQL and NoSQL Server for database management, query optimization, and improve data access performance.

Eko Electricity Distribution Company

IT Support | *May 2021-Oct 2023*

- Resolved software/hardware issues and assisted in integrating IT systems.
- Maintained and troubleshoot computer systems, peripherals, and custom software applications.
- Managed user accounts, including creation, modification, and troubleshooting across systems.
- Documented IT assets and issue resolutions, improving team collaboration and knowledge sharing.
- Provided training and support to end-users and junior team members on software and system updates.

EDUCATION

University of Ibadan, Ibadan Nigeria.

Bachelor's degree in English

GOMYCODE

Software Development

CERTIFICATIONS

- Full-Stack Bootcamp Course – 2024
- Digital Marketing – 2021
- Presentation and Production – 2018
- Information and Communication Technology – 2014
